Student Health Policy for Returning After Illness

Student Name _____ Date of absence _____

Return to School Date _____ Grade (please circle) 9 10 11 12

Students who are sick should not attend school in-person or extracurricular activities. Any student complaining of one or more of the following symptoms should stay home and, if able, participate in remote learning.

Fever 100.0F or greater or chills	Cough	Shortness of breath or difficulty breathing	Fatigue	Muscle or body aches	Headache
New loss of taste or smell	Sore throat	Congestion or runny nose	Nausea or vomiting	Diarrhea	Other

In order to prevent the spread of illness, the student must be symptom free (without the use of fever reducing medication) for 24 hours before resuming in-person learning and extracurricular activities.

- It is **highly recommended** that your child be seen by a primary care provider if complaining of any symptom that persists for 3 or more days.
- Please provide a doctor's note if your child has been seen by a primary care provider.

The State of Ohio requires schools to determine when a child, who has or is suspected to have COVID-19, can return to school by following the current rules from the CDC, Ohio Department of Health and their local Health Department. Padua will follow the most current CDC guidelines and work with the state and local health department to promote positive public health outcomes.

- *Students must notify the school of COVID-19 test results (must isolate while awaiting results)*
- *Students who are presumed positive for COVID-19 must notify the school and isolate in accordance with CDC guidelines (if testing is not available)*
- *Students who have close contact with a person diagnosed with COVID-19 or suspected to have COVID-19 must notify the school and quarantine in accordance with CDC guidelines*

A parent/guardian signature is required to resume in-person learning and extracurricular activities. Your signature indicates that the student has been symptom free (without the use of medication) for 24 hours and is able to resume in-person learning and extracurricular activities.
